# My Journey

# Release Notes

Released  2022-11-16

## Table of Contents

## Updated user experience and interface framework

- ❖ All My Journey sites were upgraded to the latest front-end development framework.
- ❖ Dropdown menus, radio buttons, and other elements may look slightly different.
- ❖ **Impact:** Overall, users will notice very small changes. The mobile experience will be improved as well as the ability for future improvements to the user interface.

## Created search functionality for lists of locations

- ❖ The list of locations are now searchable via text box.
  - ➢ Professionals can now search by location name (e.g., when toggling between locations, selecting locations for new users) in addition to scrolling.
- ❖ **Impact:** Locations are much easier to navigate and assign.

USER PROFILE
### Select Your Current Location

Update Current Location

## Added new alert option for new Referral Resources

- ❖ Professional users can add a notification when new Referral Resources are added to the Community Catalog.
- ❖ **Impact:** This will support Professional users in being aware of new opportunities available to their customers and enable them to take action in the Community Catalog.

# Added new file upload options under "Professional Development"

❖ Clients can elect to enable additional Professional Development document categories by asking their Customer Success Consultant.
  ➢ The additional categories include Cover Letters, References, Recommendation Letters, and Applications.
  ➢ Once enabled, both Professional and Individual users will be able to upload documents to these new categories.
❖ **Impact:** Professional and Individual users have additional document upload options.
