# Customer-specific

## Careers in Colorado program search

- ❖ **Bug:** Participants navigating from the Careers in Colorado tool to Program Finder occasionally did not see the occupation they selected in Careers in Colorado pre-populate in the Program Finder keyword search field. This issue occurred primarily if participants clicked to explore a few different occupations before clicking “Search for Programs” to navigate to the Program Finder.
- ❖ **Fix:** Participants will now always see the occupation they select pre-populate in the Program Finder with relevant results returned.

## Bugs addressed

### Participant EON and EULA agreements

- ❖ **Bug:** For clients with both the Equal Opportunity Notice (EON) and End-User License Agreement (EULA) enabled, participants were previously not seeing EON text populating when prompted to accept the EON.
- ❖ **Fix:** Participants will now see EON text populating as expected on instances where both the EON and EULA are enabled.
