Careers in Colorado mobile responsiveness	2
Bugs addressed	2
Location selection	2

Customer-specific

Careers in Colorado mobile responsiveness

- ❖ **Bug:** Participants viewing the Careers in Colorado tool on a mobile device previously saw text and other page elements overlap as their browser window shrunk
- ❖ **Impact:** Participants can now view Careers in Colorado information clearly on their mobile device

Bugs addressed

Location selection

- ❖ **Bug:** Participants creating an account in an instance with no visible Primary Locations were previously experiencing confusion when prompted to select a Primary Location and seeing no options
- ❖ **Fix:** Participants creating an account in these instances will be taken directly to their About Me and skip the location selection step to avoid confusion
