Truist occupation data tool tips	2
Bugs addressed	3
Participant widget count	3
Duplicate participant Outcomes	3
Participant header agreement icon	3
Program Finder matches to selected occupation	3

New functionality and improvements

Pinned participants filters

- ❖ Professionals who click Go to Participants from the Participants dashboard widget will see a more streamlined experience on the My Current Participants page, without the filtering options for participants
- ❖ **Impact:** Professionals can now more easily view all of their pinned participants

First Name	Last Name	Created At	Last Update	Aging	Location	Date Tracked	Actions
John	Doe	08/07/2023 3:19pm MST	08/07/2023 3:29pm MST	85	Afton Workforce Center	08/07/2023 3:26pm MST	ⓘ
John	Doe	08/08/2023 8:50am MST	08/08/2023 8:50am MST	84	Afton Workforce Center	08/08/2023 8:50am MST	ⓘ
Testsave	Test	03/10/2023 8:32am MST	08/24/2023 4:30pm MST	68	Afton Workforce Center	08/24/2023 4:30pm MST	ⓘ
Sample	Test	04/18/2022 12:27pm MST	10/26/2023 9:11am MST	5	Arapahoe Community College	08/08/2023 8:46am MST	ⓘ

Profile completion percentage

- ❖ Participants who view the My Profile dashboard widget will now see the percentage completion of their profile be based only on required questions
- ❖ **Impact:** The improvement reduces confusion about profiles being labeled incomplete when the remaining unanswered questions are not required

Duplicate Resources

- ❖ Professionals who click “duplicate” on a Community Catalog Resource will now see the language following that action read “duplicate” instead of “clone”, keeping language consistent across the platform
- ❖ **Impact:** Participants will be able to more easily navigate the platform given the language consistency

National occupation data tooltips

- ❖ Participants viewing occupation details will now see tooltips explaining the timeframe of the data used to calculate the Estimated Annual Job Openings, Estimated Annual Growth Rate, and Average Annual Salary data points
- ❖ **Impact:** Participants can more easily contextualize and make decisions based off of the data they see about a selected occupation

Customer-specific

Truist local occupation data and tooltips

- ❖ Participants in the Truist Build Better Careers instance viewing occupation details will now see local labor market data for select occupations, and national data for all other occupations. Participants will also see tooltips explaining the timeframe of the data included in the Estimated Annual Job Openings, Estimated Annual Growth Rate, and Average Annual Salary data points as well as an indication of whether that data for that occupation is local or national
- ❖ **Impact:** Participants can more easily contextualize and make decisions based off of the data they see about a selected occupation

Bugs addressed

Participant widget count

- ❖ **Bug:** Professionals who viewed the Participants widget on their dashboard were previously not seeing an accurate count of the participants they had pinned
- ❖ **Fix:** The participants count in the Participants widget is now accurate

Duplicate participant Outcomes

- ❖ **Bug:** Participants who navigate to My Outcomes previously saw duplicate Outcomes when they were assigned an Outcome that had already been assigned to them and they had not yet completed
- ❖ **Fix:** Participants will no longer see duplicate Outcomes for those they have not yet completed. Professionals will also be notified when attempting to assign a duplicate Outcome that the participant has already been assigned the selected Outcome

 The following participants have already been assigned to the selected outcomes and won't be assigned again: **John Doe**

Participant header agreements icon

- ❖ **Bug:** Professionals viewing the participant header were previously seeing a green agreement icon indicating that the participant had a signed agreement when they did not
- ❖ **Fix:** Professionals will now only see the agreement icon when a participant has a signed agreement

Program Finder matches to selected occupation

- ❖ **Bug:** Participants navigating to the Program Finder from an occupation in Occupation Finder were occasionally seeing long Program Finder load times and then results not matching their selected occupation
- ❖ **Fix:** After making load time improvements, participants will now see programs relevant for the occupation they selected. Programs are returned based on a CIP to SOC code mapping, so participants may still see no results where that mapping does not exist
